

CLIMATE CRISIS – LOCAL LANDSCAPES

FINAL PROJECT IN
LANDSCAPE ARCHITECTURE
2021-2022

DR. LINDA SHI

Assistant Professor at the
Department of City and Regional
Planning at Cornell University

Linda Shi is Assistant Professor at Cornell University's Department of City and Regional Planning.

Her research concerns how to plan for urban climate adaptation in ways that improve environmental sustainability and social justice.

She studies how aspects of urban land governance – including the fiscalization of land use, property rights regimes, and metropolitan regional institutions – shape climate vulnerability and adaptation responses.

She comes at these issues having worked on watershed restoration, water and sanitation, and development planning all over the world for AECOM, the World Bank, the Institute for International Urban Development, and Rocky Mountain Institute.

She has a PhD in urban and regional planning from MIT.
